Check If Applicable:  Rx Procedure  None  
 Cleancheck Procedure

**Tools & Materials Needed:**

- A. Two mop buckets with wringers
- B. Wet mops and handles
- C. Dust mop, handle and frame
- D. Dust pan and lobby broom
- E. Trigger spray bottle
- F. Clean cloths
- G. Putty knife
- H. Measuring cup
  - I. rash can liners
- J. Biohazard bags
- K. "Wet floor" signs
- L. Gloves and personal protective equipment

**Products:**

- 1. Cleaner disinfectant
- 2. Glass cleaner
- 3. Dust mop/dust cloth treatment

**Procedures:**

- I. Purpose of Delivery and Labor Room Cleaning
  - A. Maintain high sanitation level for the health and safety of the newborn infants and their mothers.
  - B. Reduce the risk of nosocomial infections.
- II. Procedure for Cleaning Delivery Rooms
  - A. Change into scrub uniform in the lounge. Put on gloves and required personal protection equipment.
  - B. Assemble all cleaning equipment and products.
  - C. Prepare cleaner disinfectant solution in one mop bucket and trigger sprayer. Measure concentrate accurately using the measuring cup.
  - D. Spray the dust mop with the dust mop/dust cloth treatment. Dust mop the floor with the treated mop. Pick

up soil with the dust pan and lobby broom. Use putty knife to remove stuck debris.

- E. Remove trash can liner after closing with a twist tie. Carefully lift liner out of trash container and put in your cart. Disinfect the trash container inside and out using the trigger sprayer of disinfectant and a clean cloth. Reline the trash container with the appropriate type of liner. A biohazard bag may be necessary.
- F. Spot wash the walls using the trigger spray bottle filled with cleaner disinfectant and a clean cloth.
- G. Place "Wet floor" signs at all entrances.
- H. Wet mop delivery room floor and connecting hall with the cleaner disinfectant.
- I. Between deliveries: Spot wash the walls using the trigger spray bottle filled with cleaner disinfectant and a clean cloth. Wet mop the floor after each delivery, changing the prepared solution after each room.

### III. Procedure for Cleaning Labor Rooms

- A. Put on gloves and required personal protection equipment.
- B. Remove trash can liner after closing with a twist tie. Carefully lift liner out of trash container and put in your cart. Disinfect the trash container inside and out using the trigger sprayer of disinfectant and a clean cloth. Reline the trash container with the appropriate type of liner. A biohazard bag may be necessary.
- C. Damp dust blinds and window sills with disinfectant solution and a clean cloth.
- D. Wash windows, as needed.
- E. Spot wash the walls using the trigger spray bottle filled with cleaner disinfectant and a clean cloth.
- F. Spray the dust mop with the dust mop/dust cloth treatment. Dust mop the floor with the treated mop. Pick up soil with the dust pan and lobby broom. Use putty knife to loosen stuck debris.
- G. Place "Wet floor" signs at all entrances.
- H. Wet mop delivery room floor and connecting hall with the cleaner disinfectant.
- I. If the floor is carpeted, follow the procedures outlined in the section on carpet care.
- J. Follow the Bloodborne Pathogen Standard when cleaning up all spills and splatters.
- K. If there is a shower area attached to the labor room, clean it following the procedure "How to Clean and Disinfect Showers".
